

General Municipality Information

In most municipalities, a work permit must be filed with either the Building Department and/or the Fire Department prior to the commencement of any tank work. On the scheduled work date, soil samples and inspections may also be required. Upon final completion of the work, it is required that all permits are closed out in writing along with supporting documentation (i.e. all manifests and soil analytic results).

Example: For the removal of a 550-Gallon UST in the Village of Tuckahoe.

A required permit would need to be obtained from:

Village of Tuckahoe Building Department

Required inspections would need to be obtained from:

Village of Tuckahoe

Eastchester Fire Department along with a required soil sample.

Required Closure Paperwork

Village of Tuckahoe

Eastchester Fire Department

Example: For the removal of a 1,500-Gallon UST in the City of Yonkers that has failed a tank test.

A required permit would need to be obtained from:

City of Yonkers Building Department

City of Yonkers Fire Department

Westchester County Health Department

Required inspections would need to be obtained from:

City of Yonkers Building Department

City of Yonkers Fire Department

Westchester County Health Department along with required soil samples.

Required Closure Paperwork

In this instance, a PBS (Petroleum Bulk Storage) Closure Report would be required. A copy would be sent to:

City of Yonkers Building Department

City of Yonkers Fire Department

Westchester County Health Department

New York State Department Of Environmental Conservation

For information on the requirements in the municipality where you live, information can either be found on your Village/City/Town Website or feel free to [contact our office](#).
